Signs that Your Weird Co-worker is Actually an Alien.

1. **Weird or mismatched clothes.** Often aliens don't fully understand the different styles, so they wear combinations that are in bad taste, such as checked pants with a striped shirt or a tuxedo jacket with blue jeans or sneakers.
2. **Strange diet or unusual eating habits.** Aliens might eat fries with a spoon or stash their food in weird places, such as the dishwasher.
3. **Bizarre sense of humor.** Aliens who don't understand earthly humor may laugh during a serious company training film or tell jokes that no one understands.
4. **Takes frequent sick days.** An alien might need extra time off to "rejuvenate its energy"
5. **Keeps a hand-written or online diary.** Aliens are constantly gathering information about human life.
6. **Misuses everyday items.** An alien may use white-out to paint its nails or money to blow their nose.
7. **Constant questions about customs of co-workers.** Aliens who are trying to learn about our Earth culture may ask questions that seem to be stupid. For example, a co-worker may ask why so many Americans picnic on the Fourth of July.
8. **Secretive about personal life-style and home.** An alien won't discuss domestic details or talk about what it does at night or on weekends.
9. **Frequently talks to himself.** A space alien may not be used to speaking as we do, so an alien may practice speaking when it thinks it's alone or may be communicating intel back to its home planet.
10. **Is always up to date on the latest technology.** An alien will already be familiar with all the latest updates in technology we have here on Earth so they will never have any questions for I.T.

There is a theory which states that if ever anyone discovers exactly what the Universe is for and why it is here, it will instantly disappear and be replaced by something even more bizarre and inexplicable. There is another theory which states that this has already happened.

Quick tips:

- If you want to be half your age: *Move to Mars*—A year on Mars is roughly equal to two years on Earth!
- If you want to lose weight: *Move to Venus*—On Venus, you will weigh 10% less than you do on Earth!
- If you want to be a basketball player: *Move to the Moon* — On the moon, humans can jump over 10 feet into the air and float for about four seconds! - Imagine the slam

Starry Night

Sherlock Holmes and Dr. Watson go on a camping trip. After a good dinner and bottle of wine, they retire for the night and go to sleep. Some hours later, Holmes wakes up and nudges his faithful friend.

"Watson, look up at the sky and tell me what you see."

"I see millions and millions of stars, Holmes," replies Watson.

"And what do you deduce from that?" Watson ponders for a minute.

"Well, astronomically, it tells me that there are millions of galaxies and potentially billions of planets. Astrologically, I observe that Saturn is in Leo. Meteorologically, I suspect that we will have a beautiful day tomorrow. What does it tell you, Holmes?"
Holmes is silent for a moment.

"Watson, you idiot!" he says. "Someone has stolen our tent!"

The density of Saturn is so low that the whole planet would float on the water in your bathtub.

However, you wouldn't want to try this experiment at home as it would leave a massive ring around the tub.

• First star I see tonight
• I wish I may, I wish I might

• ...

• Oh wait, it's just a satellite

Two blondes in Las Vegas were sitting on a bench talking at night ... and one blonde says to the other, "Which do you think is farther away ... Florida or the moon?"

The other blonde turns and says "Hellooooooo, can you see Florida?"
